**Applied Information, Inc.** is a leading developer of connected, intelligent transportation system (ITS) solutions designed to improve safety, reliability and mobility. Applied Information's Glance Smart City Supervisory System™ platform allows cities to manage all their traffic and ITS assets on one web-based application. This includes 5 key areas: Traffic Intersections, School Beacons, Parking Guidance System, Mobile Vehicle Assets and ITS devices. AI's Glance TravelSafely™ smartphone app connects drivers, cyclists and pedestrians for a safer commute. For more information, visit [www.appinfoinc.com](http://www.appinfoinc.com).
