

Power Supply Unit

PSU-900-044

Overview

The Applied Information PSU-900-044 is a cutting-edge power supply unit designed for optimal performance in traffic cabinets and various surface transportation applications. This innovative device seamlessly connects to Applied Information connected devices and has a robust built-in battery, ensuring an uninterrupted power supply. What sets it apart is its advanced capability to deliver real-time power failure notifications through the intuitive Glance platform, providing enhanced monitoring and control. Elevate infrastructure with the PSU-900-044, combining reliability, versatility, and intelligent connectivity.

Features & Benefits

- ✓ Low battery and AC OK alarm
- ✓ Universal AC input
- ✓ Suitable for various applications
- ✓ Battery backup for power failures
- ✓ Battery health monitoring
- ✓ Alarm alerts sent via text or email

Hardware Specification

Input/Output

AC Voltage Input	115-230V AC
DC Voltage Output	13.8V DC

Miscellaneous

Operating Temperature	-30°C to 70°C
Humidity	20-90% RH
Dimensions	6.02" x 2.95" x 2.59" (LWH)
