School Beacon Base Plate
Solar (AI-900-011) or AC (AI-900-013)

Overview

The AI School Beacon Base Plate is engineered for seamless retrofitting into solar or AC powered flashing beacon cabinets, delivering efficiency in installation and substantial time-saving benefits. Built for extreme temperature conditions, its minimal power demands render it ideal for solar-powered setups. Included as standard is the Morningstar SunSaver solar charger, ensuring low power management. With the AI School Beacon Base Plate, effortlessly retrofitting new timer switches into pre-existing school beacon cabinets becomes a simple and rapid process.

Features & Benefits

- Compatible with AI-500-070 Timer Switch
- Can be custom made for large quantity orders
- Morningstar SunSaver Solar Charger
- AC Panel uses standard 204 flasher
- Standard Baseplate is 14” X 12“ x 4.5”
- Low power consumption
- Peak efficiency charging of over 97%
